Remark :

- The data shown according to the inspection standard of EIAJ RC-2364A.
- The capacitance for reference only, actual value should be according to quotation
- Capacitance tolerance -3%~+10%
- Density of Residual Chloride : ≤ 1.0 mg/m²
- M-Series products : Mixed acid formed,
R-Series products : Mixed acid formed with high strength etched foils
N-Series products : Pure inorganic acid formed
